

ZAMBONI®

Nothing else is even close

The Ultimate Machine.

Over 50 years ago, Frank Zamboni set out to create the first ice resurfacer for his own ice rink.

Today, we continue to improve upon our invention in order to bring you the finest sheet of ice possible.

In the early 1940's, Frank Zamboni saw the need for a machine to quickly produce an attractive sheet of ice at his ice rink in Southern California. Through his experiments and persistence, the ice resurfacer was invented. The machine he developed for his own facility was soon recognized as being indispensable for an efficient operation and has had a tremendous impact on skating and ice sports. Zamboni Ice Resurfacers continue as the overwhelming choice of arena operators throughout the world... Frank Zamboni's belief in ongoing product improvement and innovation lives on today in the company he founded.

The employees of Zamboni honor the spirit of Frank Zamboni by closely examining every detail on the Zamboni Ice Resurfacer and then re-examining it again. There is no part on this machine where the question, "How can we make it better?" hasn't been asked. Most companies may think that this commitment to detail is unnecessary, but we know that it is this "tinkering spirit" that made Frank Zamboni what he was then, and it makes Zamboni what it is now:

[The maker of the world's leading Ice Resurfacing machine.](#)

Nothing else is even close.

The evolution of a dream.

Zamboni Ice Resurfacers have always offered unparalleled shaving and snow conveyor performance.

The large snow capacity and tank design of the 500 allows all areas of the snow tank to be completely filled, even to the top and rear corners. The 500's snow tank incorporates a smooth bottom and sides, allowing for the snow to slide out with the least amount of residue.

Designed in a compact rectangular package with a flat bottom and sides, the 500 snow tank provides the lowest front dumping height available. This is important for dumping indoors, or outdoors in adverse conditions.

Zamboni's powerful conveyor system provides the industry's highest snow compaction.

Uncompromising and unparalleled.

Our attention to detail is legendary.

Nothing about the Zamboni Ice Resurfer is taken for granted.

Every detail is given the most single minded attention, which is why Zamboni remains the overwhelming industry leader.

Nothing else is even close

The 500 continues to redefine industry standards.

The 500 has the tightest turning radius in the industry, enabling operators to resurface deeper into their corners. Both large 10 inch diameter augers are double flighted to ensure great performance, even during heavy shaving. The augers are epoxy coated for longer lasting durability. And the 500 will provide full power and speed to these augers at all times, even while slowing for corners.

ZAMBONI®

Nothing else is even close.

Knowledgeable arena operators know that a quality sheet of ice is among an arena's primary selling features. Most successful operators choose Zamboni Ice Resurfacing machines because they know Zamboni is the only real choice for unparalleled shaving and snow conveyor performance. Every feature on the 500 is deliberately designed to make ice resurfacing easier and to ensure that the result is always *a perfect sheet of ice.*

Frank Zamboni wouldn't have wanted it any other way.
