Nothing else is even close

# Get an edge with these features:

- 36 volt, 100 amp continuous electrical system.
- The 6.5HP (4.8kW) electric motor at 36 volts is significantly more powerful than competitive edgers.
- Wide 14-inch (356 mm) cut includes eight 8-sided carbide cutters, providing for a smooth cut, long-life and reduced replacement time and operating cost.
- Contoured snow chute directs snow toward center of ice, away from the boards and operator. Replaceable board guide is standard.
- Heavy duty steel plate body and runners provide stable wander-free control. Baked-on powder paint and zinc electroplating is used throughout for corrosion protection.
- Rubber wheels raise the machine up for transport away from the ice.
- Depth control is infinitely variable and not limited to factory presets. Controls are conveniently located on the handle near the operator.
- 12 volt absorbed glass mat batteries approved for air, ground, or water transport.
- Weight: 250 pounds (113kg) including batteries.

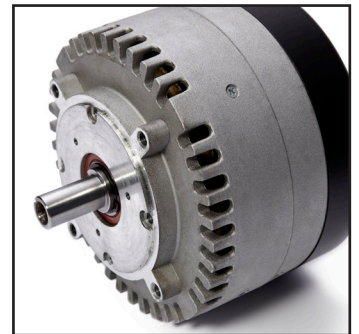

Wide 14-inch (356 mm) cut includes eight 8-sided cutters.

Quickly raise and lower edger for transport on and off the ice.

Blade height adjustment is easily performed with readily accessible handle.

Permanent magnet DC motor for low maintenance operation.

The fully automated battery charger supplied with the edger can be conveniently wall mounted or alternately hung from the fine adjustment handle.

Powered by three 12 V batteries for zero emissions and quiet operation.
