

100

**ZAMBONI®**

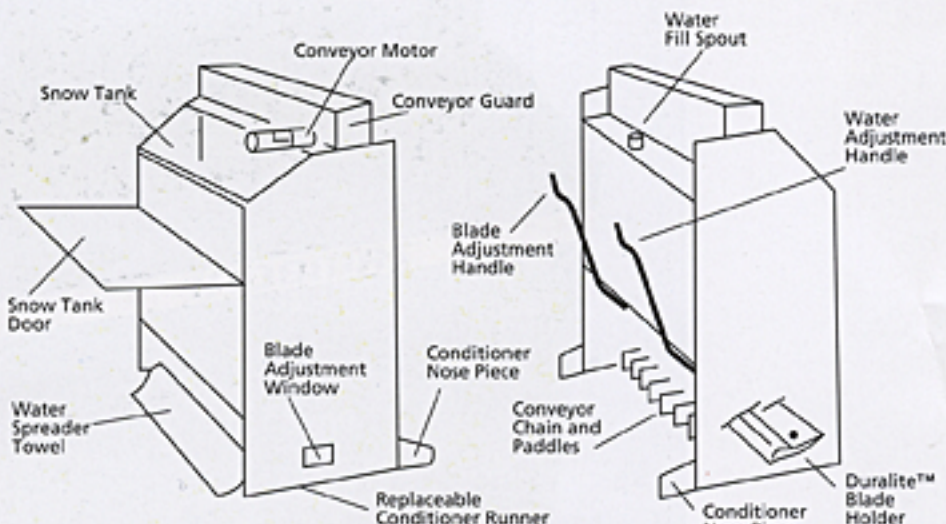

# Zamboni® 100 provides ice resurfacing capabilities in a compact unit for small ice rinks.

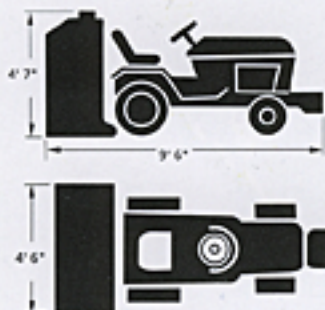

# 100

The Zamboni® 100 is "baby brother" to the famous Zamboni® designed for hockey rinks. This miniature unit, approximately 1/10 the size of the standard unit, adapts to several popular John Deere garden tractors, and is ideally suited for small rinks with surfaces of 1000 to 3000 square feet.

A major feature of the 100 is its revolutionary Duralite™ disposable blade which has superior ice shaving qualities. Like standard Zamboni® resurfacers, this compact unit shaves the ice, picks up the shavings and spreads water all in one operation.

## SPECIFICATIONS

Snow tank	10 cu. ft.
Overall height	4' 7"
Overall length (Dependent upon tractor used)	9' 6"
Overall width	4' 6"
Turning radius	8'
Rustproof ice making water tank	20 gallons
Zamboni® Duralite™ blade with disposable stainless steel insert	48"

All capacities and dimensions are approximate.

### Storage Room/Facilities

Adequate ventilation of any engine emissions must be provided in the storage room and the ice rink(s). The storage room should be heated and have adequate floor drainage. The room should be located close to the ice surface(s) to minimize travel distance, turning and ramps. Outdoor access for snow dumping and machine maintenance may be required. All doors should be minimum of 7ft. wide by 6ft. high. Dimensions of the room should have a minimum 4ft. clearance on all sides of the machine. A snow melting pit should be capable of processing 15 cu. ft. of snow per hour, per ice surface. Ice making water requirements are approximately 20 USG, per hour, per ice surface. Many operators, especially in cold climates, use hot water for their ice making that is heated to 140°F.

This brochure has been prepared only as a general guide to the customer. Every effort has been made to insure that all information is correct at the time of printing. Zamboni reserves the right to change prices, colors, materials, specifications and models. Some features described, or shown, may be optional at extra cost. Some options are required in combination with other options.
